August 15<sup>th</sup>, 2025

**To Whom it May Concern:**

The 6" CSE. Butterfly Valve is approved to be operated within processes ranging in temperature from 15°F to 200°F at pressures ranging from 0-145psi. The full range of CSE. butterfly valve configurations are approved to operate within this temperature range. This does not factor in chemical compatibility. Chemical compatibility with the elastomeric components of CSE. is the responsibility of the valves user and can adversely affect the operation of the valve at temperature.

**Best Regards,**

**Roger Shi**
