**+11,000
GAUSS**

Efficient extraction of metal fragments in liquid food products.

The Magnattack® Pressure Pipeline Magnet is engineered to effectively remove metal fragments from both viscous and non-viscous liquid food products.

This system is equipped with either a single or double configuration of high-performing RE80®HT +11,000 Gauss Magnet Probes. These Probes intercept the product flow, reliably capturing and retaining foreign metal contaminants.

- ✓ Versatile, hygienic, easily cleaned
- ✓ Effective magnetic separation ensuring leak free, uninterrupted operations
- ✓ Proven successful in numerous installations across Asia Pacific, North America, and Europe

PRESSURE PIPELINE SEPARATOR

Installation & Applications

- Incoming product/ingredient intakes
- Upstream of critical and expensive pumps & processing equipment
- Final product protection prior to packing
- Vertical, sloping, and horizontal pump lines
- Suitable for positive pressure and suction lines
- Suits products with lumps to approximately 0.4" (10 mm)
- Inline probe-style models for 1" – 8" (25mm – 200mm) pipelines
- A limited number of units are available as retrofit options for replacing outdated finger pot magnets

Key Benefits & Advantages

- Increased foreign metal fragment control & risk reduction
- Enhanced food safety
- Removal of magnetic fragments including fine metal contaminants, work-hardened stainless steel, and stone
- Maximum product-to-magnet coverage
- Magnet elements can easily be removed for cleaning
- 80%+ coverage of product stream
- Demonstrated superior efficacy compared to traditional liquid trap magnets/ pot magnets or designs featuring numerous magnet fingers welded onto a lid
- Protection against metal fragment issues, product recall, brand name damage, and customer complaints
- Jacketted designs for heated product lines

"We've had several PPS units in our liquid lines for many years now, in multiple processing plants across the country. They're more effective than the old pot-style magnets, easy to clean, and don't cause any leaks or blockages. Never had any problems with them. Simple, yet very effective."
